

Cameron Macek

CUSTOMER ONBOARDING • IMPLEMENTATION • OPERATIONS & TRAINING

Carmel, Indiana cmacek91@gmail.com cameronmacek.com

Operations and training professional with 10+ years across hospitality and customer-facing retail. I get teams to standard — new-location openings, back-of-house management, front-line customer technology — and I design and test the documentation, workflows and internal tools that keep them there.

EXPERIENCE

Back-of-House Manager

2024–Now

B’s Bagels · Westfield, Indiana

- Lead daily kitchen operations — prioritise production and resolve staffing, equipment, inventory and workflow problems during high-volume service.
- Train and coach employees on station procedures, preparation standards and safe work practices; assign tasks and follow up on execution.
- Built and am testing an internal operations portal for the shop: recipes, builds, prep, SOPs, cleaning, equipment and training, searchable from a phone.

Kitchen Supervisor · New-Location Opening Trainer

2022–2024

Cooper’s Hawk Winery & Restaurants · Indianapolis area

- Supported new restaurant openings by training unfamiliar teams on station setup, preparation, plating, and opening and closing procedures.
- Supervised kitchen departments and reinforced operating standards, helping teams get ready under time pressure.

Retail Sales Consultant

2015–2017

AT&T / Spring Mobile · Illinois

- Identified customer needs, demonstrated devices and services, and explained changing plans, promotions and product features in practical terms.
- Answered product and service questions and completed contracts, payments, orders and the related digital documentation.

EARLIER

2022 **Line Cook** · Matt the Miller’s Tavern

2018–2020 **Kitchen Supervisor & Cook** · Adult & Teen Challenge

PROJECTS

Each is labelled with where it honestly stands. Full write-ups at cameronmacek.com/work.

B's Bagels Operations Portal

BUILT

A mobile-first internal portal that replaces the binder, the group text and the one person who knows. Recipes, builds, prep, SOPs, cleaning, equipment and training — organised around the questions people actually ask mid-shift.

KitchenCost Watch

IN PROGRESS

An AI-assisted invoice system: read the invoice, match each line to a real product, normalise the units, and track what a case actually costs over time. The engineering that matters is not the extraction — it is everything built for the times the model is wrong.

Service & Standard

CONCEPT

The repeatable version of the portal: a method for capturing how a service business actually runs — shadow it, structure it, build it, hand it over — before the people who know it leave.

SKILLS

Employee training and coaching

New-location readiness and openings

Customer communication

Workflow troubleshooting

SOPs, checklists and documentation

Food cost, recipes and inventory

AI-assisted workflow design

Internal tools and prototyping
